VEHICLE TYPE: SERVICE TRUCK

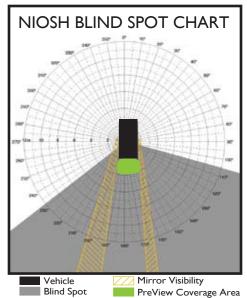

broudly developed by

- Reduce Blind Spot Accidents
- Actively Detect Objects
- ► Easily Installed

The display unit provides an audible and visual warning to the operator when an object or pedestrian is in the blind spot. This gives the driver extra time to react to prevent an accident.

One WorkZone PreView® sensor is mounted on the rear-center of the service truck. This will detect objects approximately the width of the vehicle and extend 10 feet from the bumper of the service truck (see diagram).

Available Options: Replace in-cab display

with the PreView Plus camera and monitor. The driver will receive an audible alert when an item is in the blind zone and indicators are imposed on the monitor giving the

driver approximate distancing information.

DIMENSIONS

Sensor Unit: $9.25''(w) \times 1.60''(d) \times 4.36''(h)$

In-Cab Display: 2.3" (w) x 2" (d) x 1"(h)
