11" LED Microbars

Accessories	Description
R5545LA	ECCO 5545 Series LED Minibar spare amber lens
R5545LC	ECCO 5545 Series LED Minibar spare clear lens

Description

These Reflex™ LED minibars provide a super-compact yet powerful warning solution that offers the flexibility of either permanent or vacuum-magnet mounting. The new Ecco 11" Reflex LED Minibars are the latest edition to the Reflex Minibar Series. They represent more than 25% reduction in size from the standard 15" / 381mm Minibars yet provide an output that still meets Class I & Class II specifications. Perfect where you need a low profile beacon with the benefits of high aerodynamics and low wind noise, and with the lighting punch of a standard minibar. These minibars fit well on custom lighting bars and are built rugged for your industrial applications. Featuring 12-24 VDC operation, these minibars use high-intensity LEDs to maximise light output. Users can select from 18 flash patterns, either via trigger wire on permanent mount models or cigarette plug switch on vacuum-magnet models. The 5550 Series minibar is a SAE J845 Class 1 fixture, whilst the 5545 Series minibar is a SAE J845 Class 2 fixture.
