

Speaker A-Pillar 2 x Light Mount Kit for Jeep

Description

These new A-Pillar brackets are designed to work with the Speaker Models TS3001R and TS3001V auxiliary lights, and the *Speaker Model 4415 LED work lights*, allowing customers to easily mount lights directly to the A-Pillars of their Jeep. The brackets mount onto the vehicle using the existing mounting bolts located between the windshield and the hood.

Features and Benefits

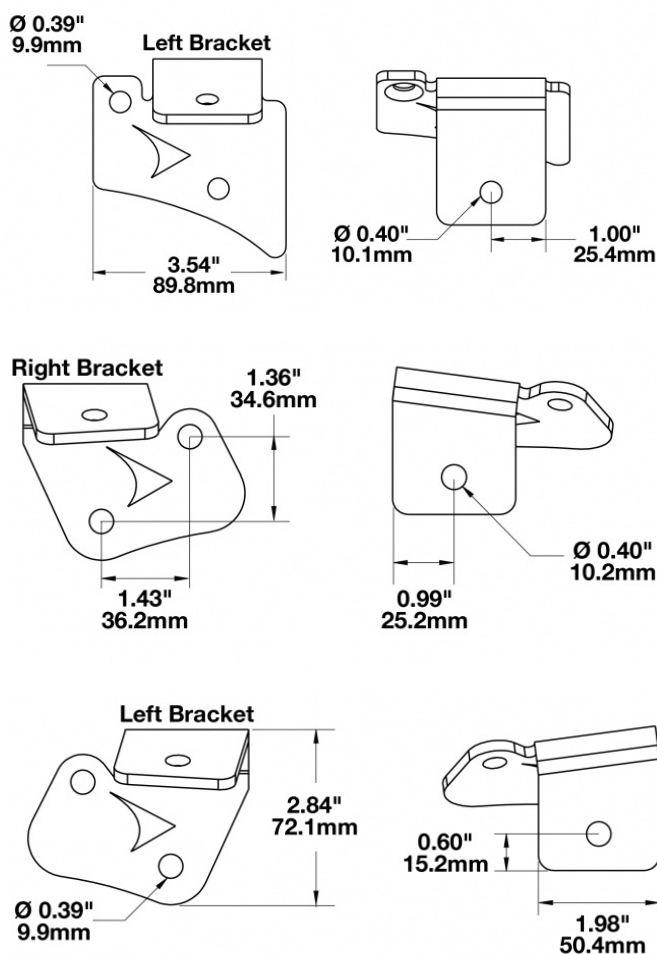

- Kit includes a set of brackets (2), including (1) right and (1) left bracket
- Includes set of neoprene rubber gaskets for additional protection between the brackets and your vehicle
- Made with heavy-duty 5052-H32 anodised quality aluminium
- Black powder-coated

Applications

Jeep Wrangler JK (2007 to current year), and Jeep Wrangler TJ (1997 to 2006)
