

Preco 300 Series Heavy Duty Back-up Alarm

Universal Mounting

Description

Versatile, durable housing provides optimum value for these low, medium and high sound level alarms. Universal mounting provides vertical or horizontal mounting options. Used by major OEMs. The 300 Series includes a manual and self adjusting range of alarms. The self adjusting alarms automatically adjust to 10 db above the surrounding noise level, thus reducing noise pollution and irritation for operators and workers.

Specialty 300 Series Alarms: Model 1059DW: Depending upon how power is applied, the unit can behave like a self adjusting backup alarm (87 to 112 db) or as a self adjusting pulsed warble sounding alarm (87 to 112 db). Either function is designed to produce 10 db nominal above the surrounding noise.

Features and Benefits

- Mount (Stud): #8-32UNC terminal studs
- Mount (Leads): 18ga 12" (300mm) wire leads. Neg (Blk) Pos (Red)
