

Vision X 2 & 3 Digit LED VID

Allows personnel to identify vehicles in any weather

Description

The Vision X ID Number Board allows personnel to quickly identify vehicles in any weather condition. Available in 2-Digit or 3-Digit configurations, these LED ID Boards can be changed as often as needed, and are engineered to run 24/7. Each digit consists of 195 high-output LEDs that are available in Amber or Red, both which produce crisp, clear numbers that can be distinguished from long distances and each digit will run even if neighbouring panels fail or suffer damage. Installing the Vision X ID Number Board means vehicles won't require numbers to be painted and can be quickly changed, reducing downtime during crucial time frames.

Features and Benefits

- Numerical LEDs Controlled Via Magnetic Sensor
- Designed For Constant 24 Hour Usage
- Durable Die-Cast Aluminum Housing
- Amber & Red LEDs Available
- Multiple Mounting Locations
- 195 LEDs Per Digit
- IP67 Waterproof

Applications

Off-highway, mining, specialty & commercial trucks and buses

Tech Specs

Input Voltage	9-32V DC
Amp Draw	14.85A @ 12V DC (2 Digit Display) 9.75A @ 12V DC (3 Digit Display)
Wattage	78W
Brackets	Mounting Bracket and Bolts
Dimensions	22.56" X 17.32" X 1.41" inches (573.02 x 439.93 x 35.81mm)
Color Options	Amber, Red or Green
Weight	24lbs (10.89kg)
IP Rating	IP-67K Waterproof
Warranty	3 Years

Part No.	Description
MIL-ID02A	2 Digit Display - Amber, 78W, 14.85A @ 12V DC with Mounting Brackets
MIL-ID02R	2 Digit Display - Red, 78W, 14.85A @ 12V DC with Mounting Brackets
MIL-ID02G	2 Digit Display - Green, 78W, 14.85A @ 12V DC with Mounting Brackets
MIL-ID03A	3 Digit Display - Amber, 117W, 9.75A @ 12V DC with Mounting Brackets
MIL-ID03R	3 Digit Display - Red, 117W, 9.75A @ 12V DC with Mounting Brackets
MIL-ID03G	3 Digit Display - Green, 117W, 9.75A @ 12V DC with Mounting Brackets
