

APS LED Safety Whips

Available in 3, 4, and 6 feet lengths

Description

APS Buggy Whips feature a safety flag and a flexible LED encased opaque tube that lights up with a 360° radiant glow to add additional safety. It's powered by a 12 volt battery or an optional lithium-ion rechargeable battery pack, and is available in: 3 lengths (3, 4, and 6 feet), 7 colours (blue, red, green, yellow, pink, white, orange), and 2 flag types (pennant or mesh).

The flag top is manufactured with premium grade rubber grommets for holding the flag in place while allowing the flag to rotate freely with the wind. The tightly sealed rubber cap on the top adds to durability and allows for submersion under water.

The 1/2" CNC-machined aircraft aluminium billet base is quick connect ready, and offers a highly durable and rust free operation. The wire plug features corrosion-free contacts; can withstand underwater submersion and heat; and is designed with the ability to quickly plug and unplug the whip to the power source.

Optional spring mount allows for maximum flexibility to your buggy whip, providing additional confidence of not breaking the whip at the base where it's most rigid.

Features and Benefits

- Easy to install
- Very low power draw - only 1.44W (3ft whip)
- Durable / Flexible / Waterproof
- Available in 3, 4, and 6 feet lengths
- 7 different colors to choose from
- Pennant or mesh flags available
- Optional spring mount available
- Quick disconnect option available

Included Hardware

- Wiring installation kit
- Wiring instructions
- Flag top
- Bolt mounting hardware

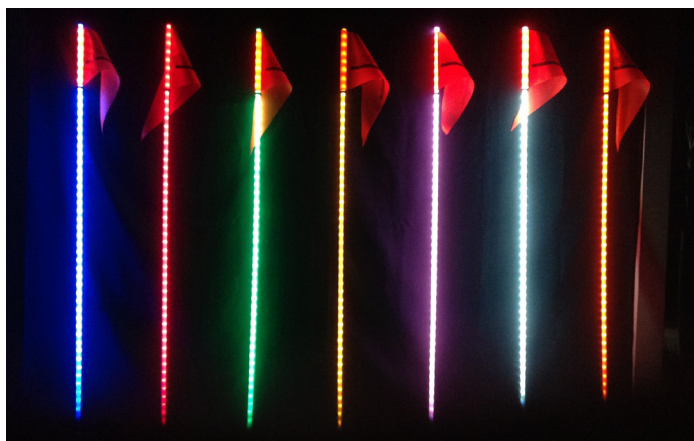

Applications

Utility and service vehicles in mining and construction

Tech Specs

Type	LED
Programmed Flash Pattern	Waterfall
Colours (available)	7 choices (blue, red, green, yellow, pink, white, orange)
Flag Types (available)	2 choices (pennant, mesh)
Lengths (available)	3, 4, 6 feet (91.4, 121.9, 182.9 cm)
Beam	360° radiant glow
Voltage	12V DC
Powered by:	12V battery, Lithium-ion rechargeable battery pack (optional)
Power Draw	1.44W (3 ft whip)
Base	1/2" billet aluminium (CNC machined aircraft aluminium)
Mounting (optional)	Optional spring mount allows for maximum flexibility and durability
Quick Disconnect (optional)	Silver, black

Optional spring mount allows for maximum flexibility and durability
