

APS Rocket II Super Bright LED Whip Light

Ten Times Brighter Than Your Average Whip LED Light

Description

The APS Rocket II Super Bright LED Light with a 1156 Base is a perfect fit any whip, using new technology that is ten times brighter than your average whip LED light.

Features and Benefits

- New technology – up to 10 times brighter
- Ultra strong durable polycarbonate base eliminates power failures experienced with traditional 1156 lamp socket
- Available in Amber, Blue, Green, Red and White
- Remote control is available and sold separately
- Replaceable LED Circuit
- Replaceable Screw-On Clear Lens
- O-Ring Waterproof Lens Seal

Application

Mining, Utility Vehicles, Heavy Equipment, Industrial, Construction, Utility and Agriculture.
