

True North Stealth Radio Harness

Trap the least heat and keep you comfortable

Description

The collection of best-selling Radio Harnesses feature all the bells and whistles that customers expect from True North products. With adjustable pockets designed to fit all makes and models of radios and our internal suspension system that keeps harness fit stable, to upgraded, lightweight low-profile back harnesses, the re-designed Radio Harnesses are even more comfortable, durable and functional than ever.

With the smallest foot-print of any harness, the True North **Stealth Radio Harness** is guaranteed to trap the least heat and keep you the most comfortable. This radio harness also converts from a chest harness to a belt harness, or can attach to your pack's shoulder harness. Now that's cool.

Features and Benefits

- Adjustable radio pocket fits a wide range of models from larger legacy radios to smaller, modern handsets
- Belt loops fit belts up to 1 3/4"
- 1" MOLLE attach
- Removable low profile back harness constructed from lightweight yet durable Hypalon™
