

# ECCO ED0001 Series

The ECCO ED0001 Series is a highly versatile directional light that can be utilized in mining, construction, municipalities, transportation and underground safety applications. It features IP67 rating and SAE J595 Class I compliance. 12-24V DC multiple voltage covers almost all mobile equipment.

With 24 flash patterns and 5 colour options to choose from, this light is ideal for underground or surface mining equipment, construction and forestry vehicles, medical EMT vehicles, and on/off indicators on slow-moving/tramming equipment. This light has been installed on many haul trucks to indicate a truck is under grid resistor braking. The applications are endless.

- Surface or bracket mounting
- Class 1 rated luminarie
- 12-24V DC operation
- Multiple color options
