## Redefined Clarity with Dual HDR

**STARVIS 2**

2K QHD

### STARVIS 2

All ELITE models feature top-of-the-line Sony STARVIS 2 image sensors for best video quality in challenging scenes.

With sensitivity superior to that of the human eye, it enables object shape and color recognition even in dark locations and obtains the required information with accuracy, contributing to greater safety and security in society.

Sony's image sensors with their high sensitivity and low noise technology, as well as wide dynamic range technology, will ensure that images are captured regardless of daytime or nighttime.

STARVIS 2 On

### 2K QHD

5-megapixel Sony STARVIS 2 sensor recording in 2K Quad HD (2560x1440) at 30FPS and 142-degree angle.

### f/2.0

The 7-layer f/2.0 aperture lens (front and rear) provides a great mix of depth of field and low-light performance. The 142-degree angle covers a wide field of view with minimal distortion.

### HDR-Powered Night Clarity

ELITE 8 offers improved dash cam performance with advanced HDR technology. It is designed to provide clear and well-balanced video recordings in both bright sunlight and low-light situations.

ELITE 8 helps you capture reliable footage with better visibility and contrast.

### BlackVue HDR

Enhanced BlackVue HDR optimizes exposure to prevent overly bright highlights and dark shadows, ensuring balanced and detailed video in all lighting conditions.

*\*HDR: High Dynamic Range*

### Clear and Bright Video in Any Light

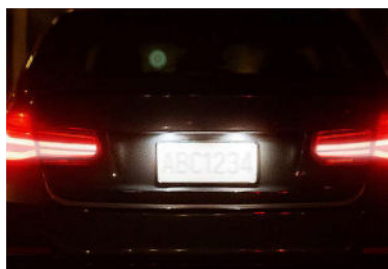

- Many dash cams struggle to record clear footage in dark or uneven lighting.
- With HDR, ELITE 8 improves both brightness and clarity, resulting in well-balanced video with strong contrast.
- Whether in a dark tunnel or driving at night, this feature helps keep important details clear without overexposure or dark shadows.

### Easy-to-Read License Plates

- Being able to read license plates clearly is important when reviewing footage after an incident.
- HDR reduces motion blur and improves detail, making license plates easier to read while vehicles are moving.

### Better Image in Changing Light

- Rapid changes in lighting, such as exiting tunnels or facing direct sunlight, can affect video quality.
- HDR technology in the ELITE 8 adjusts bright and dark areas, helping to maintain clear and balanced images in these situations.

HDR Off

HDR On

### Elite Protection 24/7

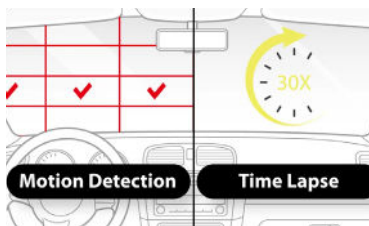

ELITE detects and records a wide range of incidents such as driving impacts, parking impacts, sudden acceleration, braking, sharp turns, and speeding using the built-in G-Sensor and GPS.

### Pre-Event Recording & Event Protection

- The 1-minute Event clips include a 10-second pre-incident buffer to show indisputable proof of responsibility.
- The latest 50 Events are protected from overwriting to avoid accidental loss of crucial footage.

### Parking Mode

### Buffered Parking Mode

- Motion: records a 1-minute buffered video whenever a motion is detected by the front or rear camera.
- Timelapse: records constantly at 1 frame per second so each 1 minute video covers 30 minutes of real time.
- In both modes, the dash cam also records buffered Event clips in case of impact.

## Redefined Clarity with Dual HDR

### Design & Interface

Iconic Cylindrical Design  
 Redefined Clarity with BlackVue HDR  
 Built-in WiFi & GPS

ELITE 8-1CH

ELITE 8-2CH

### What's Included

USB-C  
Power Cable

Dual USB-C  
Car Charger

Blackvue MicroSD Cards  
64GB / 128GB / 256GB / 512GB

### Recommended Accessories

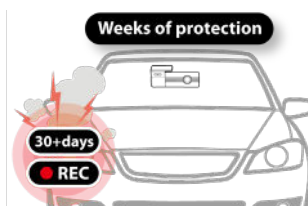

B-130A Ultra Battery  
Extended Parking Mode  
without car battery drain

CM100GLTE  
USB Plug-in  
LTE Connectivity Module

Tamper-Proof Case  
Block Physical Access  
to the MicroSD Card Slot  
and Power Button

### Power Saving Mode

The dash cam wakes up on impact then goes back to standby mode after 1 min recording (buffered recording not supported).

Provides several days of protection. Ideal when leaving your vehicle unattended for extended periods of time.

### Connectivity

#### Seamless App Pairing

Connect to your ELITE dash cam effortlessly with the BlackVue App!

- No manual needed - Simply follow the app's step-by-step instructions.
- No fuss - No need to input passwords manually.
- Secure - The initial pairing process is secure and lets you connect even more easily afterwards.

#### Fast WIFI

Browse your ELITE videos and transfer videos to your phone in the blink of an eye.

- Fast browsing - Browse your videos lag-free and change settings.
- Instant review - Transfer videos to your phone in the blink of an eye.
- Live View - See through your camera's lens in real time.
- Easy updates - Upgrade firmware to enjoy new features and improvements.

#### BlackVue CLOUD

ELITE is compatible with the industry leading BlackVue Cloud service.

- Instant impact notifications.
- Auto backup of event videos.
- Remote Live View and more.
- GPS Tracking with your app.

\*Cloud is an optional service!

### Applications

Commercial and private vehicles, trucks, long-haul trucks, fleet trucks, lorries, waste, utility vehicles

### Tech Specs

Resolution	2K OHO (Front)+ 2K OHO (Rear)
HDR	Front / Front & Rear
WIFI	Built-in (2.415GHz, 802.11 a/b/g/n/ac)
GPS	Built-in (Dual Band: GPS, GLONASS)
Parking Mode	Supported with Parking Mode Kit or Battery
Memory	Micro SD Card (64GB / 128GB / 256GB / 512GB)
Cloud	Supported with Wi-Fi hotspot or BlackVue LTE Module
Viewing Angle	Front: Diagonal 142°, Horizontal 118°, Vertical 62° Rear: Diagonal 142°, Horizontal 118°, Vertical 62°
Recording Mode	Normal recording Event recording (when impact is detected in normal and parking mode) Manual recording (File locked) Parking recording (when motion is detected) Power Saving (Supports extended parking mode by minimizing battery consumption)

Part No.	Description
KRHQD-EL81-	BlackVue Elite 8-1CH Dashcams, Redefined Clarity with HDR
KRHQD-EL82-	BlackVue Elite 8-2CH Dashcams, Redefined Clarity with Dual HDR
